Day 1- Session 2: Problem mapping and stakeholder analysis	
Satisfaction with Speakers	6.1(4,7)52
Satisfaction with content	6(4,7)52
Please Provide any other suggestions,comments etc here	
Clarity on application needs to be addressed	
Suggestions: more actual examples, case studies (like Mr. Bhat)	
It would be nice to have more reference material that we can go through post the session, so as to be better equipped.	
Can we have a session on strategies for getting your first 10 customers ?	
Really Good one. First session was excellent it was to the point without deviation.	
Excellent presentations with good case studies	
Good going. Can you give 2 min gap between hours	
I would like to know ways to reach the speakers after the session is over. After the session is over, we would think over the information provided during the program. This would create some questions. If there is a way to contact speakers till 1 to 2 days after the session is over, it would be very beneficial to us.	
Please give reference book list for problem mapping	
So far so good	
a interactive session would be more helpful.	
It was very exciting sessions and taken into other level of thinking. Thank you.	
Should be more interactive	
The session was very helpful to look in a better way about Startup concepts. Thank you!	
It would be great if we get the technique/guide/links to solve the technical process (problem mapping, gap identification).	
pace could have been a little slower	
Would like to hear more about experiences from entrepreneurs like Aditya	
It's really helpful. Thank you so much	

A suggestion for future events- repetitive content could be avoided and more case studies + real life entrepreneurs interaction could be incorporated

imformative sessions and guides me to take few descions, it would be of great help if you share the emails of all the spekers, Also it would be great help if the PPT and if recorded video is availible for reviewing (like the IITB sine is sharing the link) .Thank you so much for the session again

Lot of theory presented , Some more case studies will bring in more interest.

The problem mapping session was very nice. More such sessions and case studies would be highly benificial

Problem mapping & stakeholder analysis can be improved, it's interesting but over the time it gets boring

How did you hear about the event
