Technologies for the Utilization of Animal and Tannery By-products - by Dr. Balaraman Madhan

Utilization of Animal and Tannery By-products

Dr Balaraman, Madhan

Senior Principal Scientist & Head
 Centre for Academic & Research Excellence
 CSIR-Central Leather Research Institute,
 Chennai, INDIA
 madhan@clri.res.in; madhanclri@gmail.com

The Tanning industry

- Raw material intensive
- Labour intensive
- Technologically mature
- Despite its impressive growth, has a negative image due to pollution related problems
- Due to enactment of strict environmental compliances, there was a huge shift of tanning activity from developed to developing countries during 70s in the last millennium

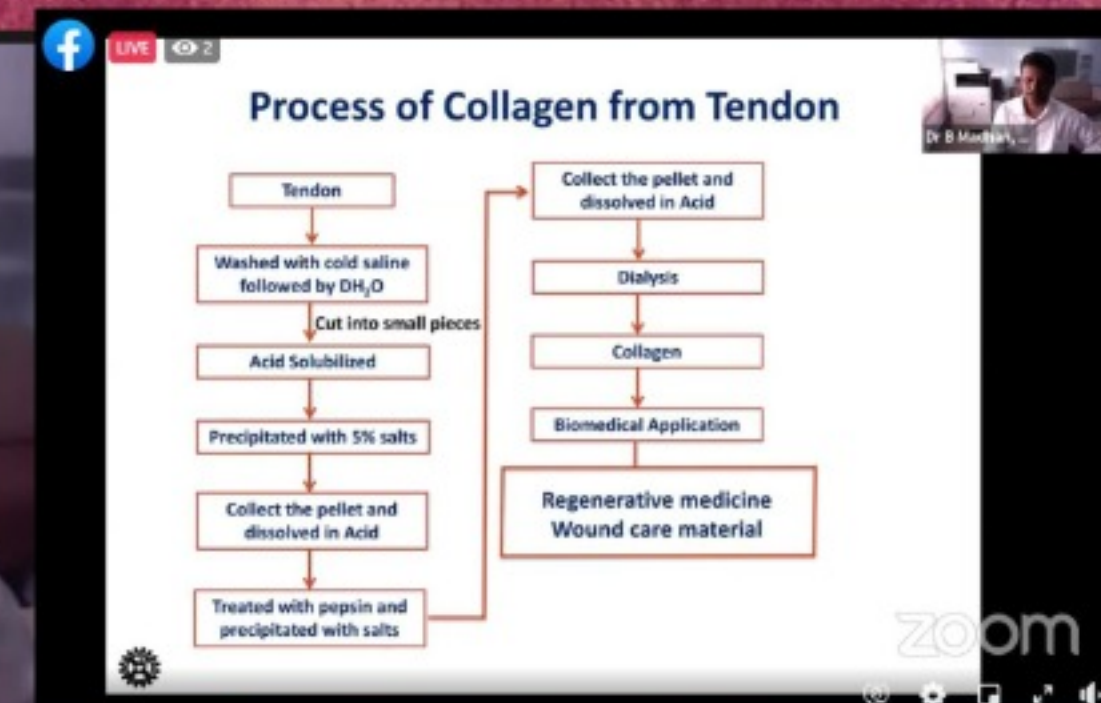

Leather Sector: Connects rural farmer and fashion world

Animal rearing Slaughter houses Preservation Tanning Semi processed Finished leather Leather Products
